[Spirent Communications Chooses SL Corporation to Enhance Reporting in Perform OSS](#)

2:03 pm - September 4th, 2008

SL RTView's Extensible and Customizable Real-Time Visibility Benefits Customers SL Corporation® announced that Spirent Communications plc selected SL's RTView™ to enhance the reporting functionality within the Spirent Perform™ operations support system (OSS). This integrated solution enables Spirent to provide customers with a fully supported and extensible visualization solution that meets their current and future management needs.

“RTView's robust and extensive feature set helps ensure our Perform clients have the ability to deliver the most effective dashboards, alerts and reports for their businesses, now and going forward,” said John Cunningham, vice president, Service Assurance at Spirent Communications.

Spirent Perform is an advanced OSS that provides automated quality of service (QoS) monitoring and assurance to help companies such as Qwest, Embarq, and Sprint/Nextel manage Service Level Agreements. The latest release of Perform, version 2.0, fully incorporates the RTView platform, and all existing reports have been migrated to RTView.

Spirent upgraded the standard reporting functionality within Perform to a more comprehensive and customizable visualization offering. They chose to work with SL Corporation because of RTView's reputation and capabilities beyond standard reporting, including:

- *** DBMS support for retrieving data from sources such as XML streams, Web Services, HTM/Scrape, JMS;
- *** Real-time GUI views;
- *** Animation capabilities;
- *** Support for queries from various sources into one table;
- *** Data collection/storage – can collect data from various databases and store them within a single or multiple other data sources;
- *** Alerts available such as SNMP traps and customized alerts/actions; and
- *** Customization available for commands, functions, and external interfaces.

“Perform enables Spirent's customers to more tightly monitor their networks and offer increasingly stricter SLAs, thereby increasing revenues and margins,” said Ted Wilson, vice president of Business Development for SL Corporation. “The comprehensive real-time visibility provided by RTView will further help these customers to identify performance issues more quickly – prior to impacting services, which can lead to significant operational cost savings.”

For more information about Spirent, please visit their website: <http://www.spirent.com>.

For more information about SL's RTView platform, please visit its webpage:<http://sl.com/products/rtview.shtml>.

To download Bloor Research's recent product review of RTView, please visit their webpage: http://sl.com/pdfs/bloor_productreview.pdf

About SL Corporation

Over the past 24 years, SL Corporation has become the leading, most knowledgeable, and most responsive provider of real-time monitoring, analytics, and visibility solutions. SL's flagship product, RTView, addresses a broad spectrum of enterprise visibility challenges spanning business activity monitoring (BAM), application performance management (APM), and component-level infrastructure monitoring. RTView has also become the de facto standard for extending the visualization of complex event processing (CEP) engines, TIBCO messaging middleware, Oracle Coherence data grids, and custom applications. SL's exclusive focus on real-time visibility solutions, commitment to customer success, and partner-centric culture are why thousands of industry leaders have chosen to work with SL to support their most critical applications and businesses.

For more information about SL Corporation, please visit their website: <http://www.sl.com>

About Spirent Communications plc

Spirent Communications (LSE: SPT) is a global provider of integrated performance analysis and service assurance systems that enable the development and deployment of next-generation networking technology such as Internet telephony, broadband services, 3G wireless, global navigation satellite systems, and network security equipment. Spirent Communications' solutions are used by more than 1,700 customers in 30 countries, including the world's largest equipment manufacturers, service providers, enterprises, and governments. Based in Sunnyvale, CA, Spirent Communications has 1,500 employees worldwide.
